

## **NORTH STAR NURSERY AND HOLIDAY CLUB** **RISK ASSESSMENT POLICY**

North Star Nursery is committed to promoting the safety and welfare of all our children, parents, staff and visitors. In order to do this, we aim to ensure that all activities, outings, materials and equipment are safe.

The purpose of this policy is to ensure that any hazards associated with these are identified and removed, or minimised to an acceptable level. Having a process of risk assessments in place is good practice as well as an Early Years Foundation Stage welfare requirement. They are also necessary under Regulation 3 of the Management of Health and Safety at Work Regulations 1999.

The EYFS 2012 states "that providers must have a clear and well understood policy and procedures, for assessing any risks to children's safety and review risk assessments regularly."

### **1. Who undertakes risk assessments & when?**

The Early Years Statutory Framework states that it is for providers to judge when risk assessments should be in writing. The Nursery Manager and staff will decide what needs to be formally recorded. Those risk assessments which are written down will be shared with the staff.

The Nursery Manager in conjunction with the staff team will ensure regular risk assessments of the premises (indoors and out), outings and other activities are conducted.

Daily checks by way of a visual inspection, are carried out of the premises and equipment before the children arrive. The outdoor play area is inspected on a daily basis by staff members before the children go out to play to ensure that the outdoor play area is free from hazards. Actions will be taken to minimise any risks from hazards identified immediately.

Children are encouraged (where appropriate to their age/stage of development and understanding) to do their own risk assessments of activities to identify what might happen and what can be done to reduce the hazard or risk.

All outings with the children are subject to a risk assessment. This includes an assessment of the ratios of adults to children needed for outings, and it includes an assessment of the risks and hazards that might arise for the children. Parental permission for routine outings is always to be obtained in advance.

All written risk assessments are kept in a folder which is located in the nursery staff room. These can be accessed at any time on request by staff and on request by parents and visitors.

### **2. Risk Assessment Content**

The risk assessment will include:

- What the risk is
- Identification of who might be harmed
- Evaluation of the probability and severity of harm (Risk Rating)
- Identification of all reasonably foreseeable hazards which might cause harm
- Identification of all reasonably foreseeable control measures
- Assessment of the risk factor resulting from implementing the control measures
- All completed Risk Assessments should be signed by the person responsible.

Risk assessments must take into account the numbers, ages and abilities of the children, resources available at North Star Nursery (including staff, finances and space), the weather and any other relevant environmental factors. An example risk assessment is attached at Appendix 1.

Note: A hazard is something such as a piece of equipment or an activity with the potential to cause harm. A risk is a measure of the probability that the hazards potential for harm will materialise. For example, a hazard could be a climbing frame and the risk could be injury as a result of falling from it. The risk assessment would identify and assess the risk and identify ways of minimising harm e.g. by ensuring the equipment is supervised at all times while being used and by providing a safety surface, etc.

### **3. Review of Risk Assessments**

Risk assessments are formally reviewed on an annual basis unless there is any change in circumstance, environment, equipment or activity in which case a new risk assessment will be carried out immediately. Risk assessments are reviewed to meet the particular needs of children, staff and visitors. Risk assessments will be reviewed following an incident.

All accidents and incidents will be recorded and monitored to identify further steps to be taken. Ofsted will be informed of any significant accidents or injuries as well as complying with RIDDOR (Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 1985).
